Matomo ft. Metabase

Improve your Matomo visualizations

01. Introduction

02. Presentation of Metabase and the work done

03. Future developments

Introduction

We are Open Source Politics

- Civic tech company
- Working around the Decidim software
- Aiming at working fully on open-source softwares

Opensource politics

l'expérience démocratique

Demo 1 : Decidim

The problem that rose

- Many different data sources (Decidim, Matomo,...)
- No tools for analysing them and having an overview of them

Introducing Metabase

- Open-source alternative to PowerBI / Tableau
- Advantages :
  - centralize all relevant data in a single place
  - offer talkative visualizations

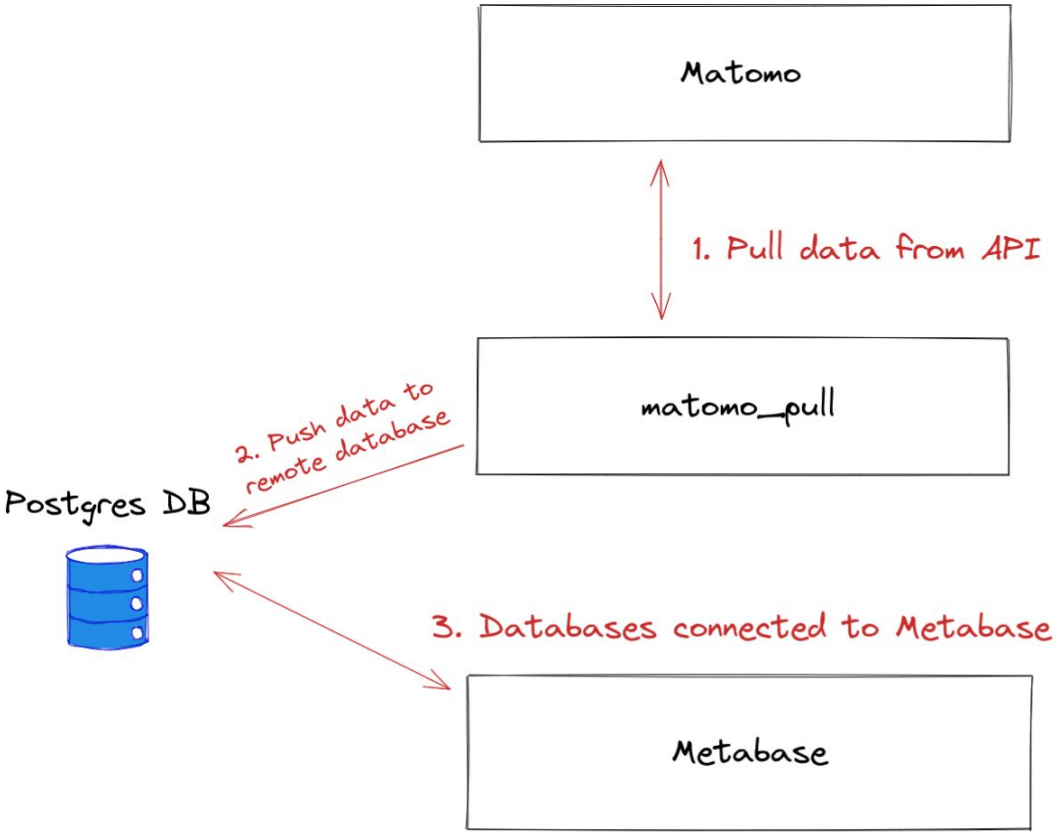
Demo 2 : Metabase

Work done around Metabase and Matomo

Work done around Matomo & Metabase

- No drivers for Matomo
- + not-very-user-friendly database scheme for Matomo

… and here we are



Demo 2 : Matomo _ pull +
Metabase again

Future developments and improvements

- GDPR compliancy
- More endpoints discovery
- Transform into a Matomo Driver

Warm thanks ! Any questions ?
